Re: Technical Review Committees

Dear Ms. Bailey:

In accordance with SARA Section 211, we are establishing technical review committees to review and comment on our efforts under the Installation Restoration (IR) program. We are currently conducting RI/FSs at ten installations in Virginia; a list of these is enclosed. We request you designate a representative to these committees at this time. This representative should be able to review our reports in a timely manner and attend committee meetings at or near each installation.

SARA also mandates increased state involvement at both NPL and non-NPL sites. We envision your representative acting as the state point-of-contact for determining potential ARARs, identifying state laws concerning removal and remedial actions, and otherwise fulfilling SARA requirements for consultation and coordination.

Please have your representative(s) notify us by December 20, 1987 so we may initiate the review process for those installations with completed draft IR reports. Our points of contact are Jerry Wallmeyer and Cherryl Barnett, (804) 445-1814.

ACTION
*

Sincerely,

J. R. Bailey

J. R. BAILEY, P.E.

Head, Environmental Quality Branch
Utilities, Energy and Environmental
Division

By direction of the Commander.
